Prolific Project

Research Goal:

In this report, we aim to test the effect of two types of worker incentives on Prolific worker's quantity and quality of work in a writing task.

Research Method:

We conducted a natural field experiment using a popular online worker platform, Prolific.com. We posted two written tasks on the Prolific job board. The Prolific workers are redirected to the Qualtrics survey website to complete the task. We vary the worker incentives between these two tasks. The tasks aim to analyze how to register to vote in Massachusetts based on a government website. Workers were given this link to refer to:
https://www.sec.state.ma.us/divisions/elections/voter-resources/registering-to-vote.htm

In the first task, workers received a guaranteed payment of $2 upon completing a review of 150-200 words based on the Massachusetts voter registration website. The review must clearly outline who can register to vote, the deadlines for registration, and methods of voting. Workers were also asked to include frequently asked questions, encouraging people to register by highlighting the simplicity of the process. Workers were required to complete the survey within 30 minutes of the opening.

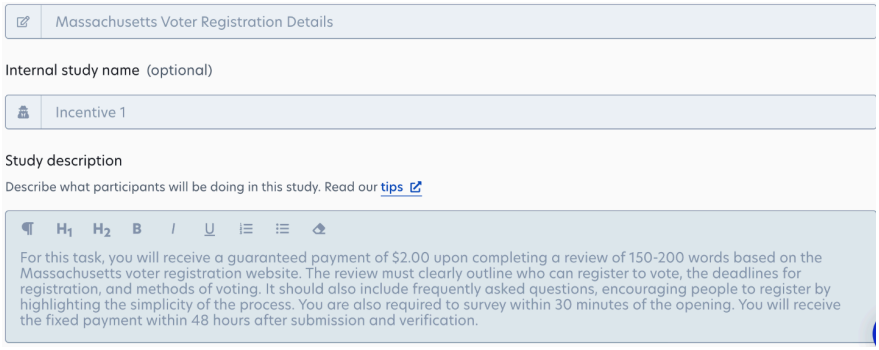

In the second task, workers received a base payment of $1.50 for completing the review, with the chance to earn an additional $0.50 if their review met higher quality standards. Workers were required to complete the survey within 35 minutes of the time of opening. In this incentive, we clearly stated that the payment was contingent on the review meeting word count and other necessary criteria.

Data Collection:

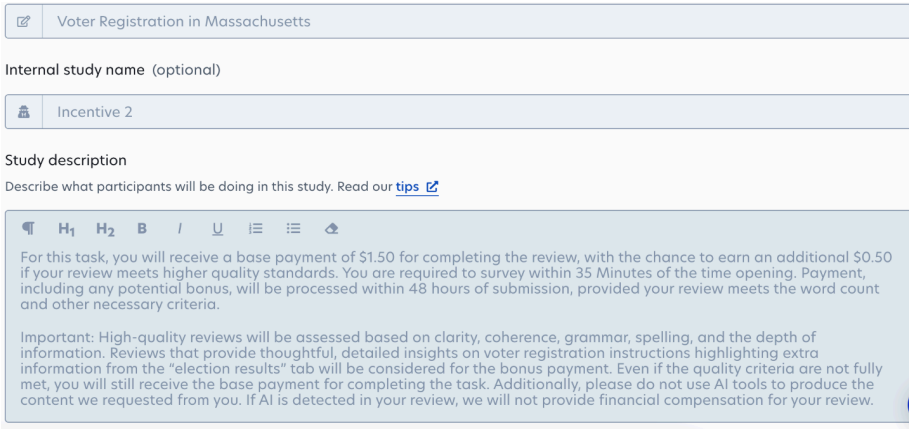

We collected the written response from each worker and converted the text data into measures that capture the quantity and quality of the written response. We measure the quantity of work by word count. We measure the quality of work by the quality score.

We conducted multiple T-tests using each of the above-mentioned quantity and quality measures. The comparison is done between workers in the two tasks with different worker incentives. We also ran a regression analysis to check the robustness of our findings by controlling for various types of demographic variables, including gender, language proficiency, and ethnicity.
Below, we provide two versions of screenshots for the instructions and worker interface we used on Qualtrics. The first screenshot is the one used for the baseline condition. The second is used for the intervention condition. Note that the two versions only differ in bonus payment and requirements for receiving payment.

Incentive 1

Incentive 2

Budget:

The total spending incurred by this study is $70. This includes the payment in the baseline condition of $2.00 and in the treated condition of $1.50. Below, we attached the screenshot of the payment receipt with Prolific worker IDs. We rejected payment for incentive 1 and incentive 2 for workers who did not answer essential study questions or purposefully gave low-effort answers. This reduced the cumulative cost of our study.

Incentive 1

Breakdown by participant - Summary #P59BK9 / 07 November 2024 / Massachusetts Voter Registration Details

Participant	Reward	Platform fees	Vat	Total
63279085ec65a992cc521187	$2.00	$0.66	$0.00	$2.66
664b556302986cf5ccd650f4	$2.00	$0.67	$0.00	$2.67

Incentive 2

	Coefficients	*Standard Error*	*t Stat*	*P-value*	*Lower 95%*	*Upper 95%*	*Lower 95.0%*	*Upper 95.0%*
Intercept	44.92592593	6.696337186	6.7090298	3.795E-08	31.41217	58.439681	31.41217037	58.43968148
Bonus Incentive	102.956427	10.7730628	9.556839	4.266E-12	81.215506	124.69735	81.2155061	124.6973479

- The **R-squared value** of 0.6849 indicates that 68.49% of the variation in the dependent variable is explained by the bonus incentive in the regression model.
- The **intercept value** of 44.93 represents the predicted average word count for workers in the baseline group (fixed payment incentive).
- The **bonus incentive coefficient** of 102.96 indicates that workers who received the bonus incentive wrote 102.96 more words on average compared to the baseline group.
- The **t-statistic** (9.569.569.56) is high, and the p-value [4.27×10^(12)] is very small, confirming that the bonus incentive has a highly significant and positive impact on the word count.
- At the 99% **significance level**, we can confidently conclude that the bonus incentive increases word count.

- ***Reg: wordcount = a + b*treatment + c*control variables***

Do you feel the website were clear? 0=No 1 =Yes	18.63146696	20.72891728	0.8988152	0.374411387	-23.33203221	60.594966	-23.332032	60.594966

- The **R-squared value** of 73.70% indicated the variation in word count is explained by the bonus incentive, demographics, and website clarity perceptions in the regression model.
- The **intercept value** of 21.37 represents the baseline word count for a reference individual (baseline group, non-Caucasian, male, English non-native, perceived website clarity = 0).
- The **bonus incentive coefficient** of 98.41 demonstrates that even after accounting for demographic and perception control variables, workers receiving the bonus wrote **98.41 more words than those in the baseline group.**
- The **t-statistic (9.09)** and **p-value (4.50×10^-11)** confirm that this effect is **highly significant.**
- Among control variables:
    1. Caucasian: Workers identified as Caucasian wrote 25.19 fewer words on average, a **statistically significant reduction (p=0.024)**.

2. Gender (Female): No significant effect (p=0.51), suggesting gender does not predict word count in this context.
3. English First Language: English-native workers wrote 25 more words on average, but this effect is not statistically significant ($p = 0.47$)
4. Website Clarity: The perception of website clarity does not have a statistically significant impact on word count (p=0.90).

2. Quality score

- ***Reg: Quality Score = a + b*treatment***

Regression Statistics								
Multiple R	0.532152

- The **R-squared value** indicates that approximately 28.3% of the variability in workers' quality scores is explained by the bonus incentive model, suggesting a moderate explanatory power.
- The **intercept value** of 3.22 represents the predicted quality score for workers in the baseline group (fixed payment incentive).
- The **bonus incentive coefficient** of 3.01 indicates that workers who received the bonus incentive scored, on average, 3.01 points higher in quality compared to the baseline group.
- The **t-statistic** (4.07) is substantial, and the p-value (0.0002091) is highly significant, demonstrating that the bonus incentive has a strong positive effect on quality scores.

- ***Reg: Quality Score = a + b*treatment + c*control variables***

- **The R-squared value** indicates that approximately 41.2% of the variability in workers' quality scores is explained by the model, suggesting a moderate to strong explanatory power when accounting for bonus incentives and other factors.
- **The intercept** of 0.44 is the baseline predicted quality score when all other variables are zero.
- The **bonus incentive coefficient** of 2.55 suggests that workers with a bonus incentive **achieved an average quality score increase of 2.55 points**, holding other factors constant. This effect is statistically **significant with a p-value of 0.0013**.
- Among control variables:
    1. The Caucasian coefficient (−1.99) indicates a negative association with quality score and is **statistically significant (p = 0.0099)**, suggesting differences based on ethnicity.
    2. The English as a First Language coefficient (2.43) and clarity of the website coefficient (1.55) both have positive but statistically insignificant effects.
    3. The Gender (Female) coefficient (0.34) also has an insignificant effect on quality score.

3. Typo/error Ratio per 10 words

- ***Reg: Error count ratio = a + b*treatment***

Regression Statistics

- The **R-squared value** indicates that 41.19% of the variability in the error count ratio is explained by the bonus incentive model, highlighting a modest explanatory power for predicting error reductions.
- The **intercept value** of 0.027 represents the baseline error count ratio when all baseline variables are zero.
- The **bonus incentive coefficient** of -0.035 indicates a statistically significant reduction in error count ratio (typos) with a **p-value of 0.0093.**
- Among control variables:
    1. The Caucasian coefficient (0.015) suggests a slight increase in the error count ratio, though the effect is not statistically significant (0.249).
    2. The Gender (Female) coefficient (0.041) and English as First Language coefficient (-0.015) both have very small, statistically insignificant effects on error count.
    3. The Clarity of the website coefficient (0.022) has a positive but also insignificant effect (0.362).

Conclusion and Discussion:

Our study demonstrates the significant impact of incentive structures on worker performance in online tasks. Workers in the bonus incentive condition not only produced higher word counts but also demonstrated improved quality and reduced error rates compared to those in the fixed-payment condition. This indicates that performance-based incentives can effectively enhance both the quantity and quality of outputs.

We noticed that workers were more incentivized to successfully complete the writing task when presented with a lower fixed payment but offered the potential to earn a bonus. In the second incentive condition, we included very clear language about prohibiting AI usage and outlined how we would evaluate workers' writing for the bonus payment. This suggests that workers respond well to strict guidelines and clear expectations for task completion. While all workers were given the same baseline writing task, those in the bonus condition were more likely to complete it and provided more thoughtful responses, despite the fixed-payment group being guaranteed a higher payment.

Additionally, the clarity and specificity of task guidelines played a crucial role in encouraging participants to adhere to expectations, particularly in the bonus incentive group. This finding emphasizes the importance of well-communicated instructions in achieving desired outcomes.

Our results offer valuable insights into designing worker incentives in digital platforms and highlight the potential of performance-based rewards in motivating higher engagement and effort. Future research could explore the long-term effects of such incentives, variations across

task types, and their implications for different demographic groups. These avenues can further refine strategies for optimizing workforce productivity in digital economies.

Source Data:

The source data is transcribed exactly as it was written in Prolific from each worker.

Baseline Condition Responses

1. “Registering to vote in Massachusetts was surprisingly easy and straightforward. I did it online, which took less than 10 minutes. I went to the Massachusetts Secretary of State,Äôs website, and the steps were pretty clear. I filled in my basic information, verified my citizenship, and confirmed my address. They even let me register using my driver,Äôs license, so I didn,Äôt have to dig up any extra paperwork. After submitting, I got an email confirmation almost instantly, letting me know that my registration was pending and that I'd be notified once it was processed. A few days later, I received an official letter in the mail confirming my registration, which was reassuring.”

2. “The voter registration process for Massachusetts has always been fairly simple for me. I was able to register when I turned 18 in addition to registering for the draft. Now it seems that there are onl”

3. “I do not have any strong opinions or feelings one way or the other about the Massachusetts Voter Registration Process. As an individual who lives in Oklahoma, I am only familiar with the ways that I am able to register to vote. If it is anything similar to Oklahoma's I assume there would be ways that could allow one to set up the voting registration through mail, online, or in person registration. Then of course once you are registered to vote in the state of Masscachusetts, you would be allowed to cast a vote with early mail voting, or in the polls.”

4. “The Massachusetts Voter Registration Process is quite straightforward and accessible. To register, you can submit an application online, by mail, or in person at your local election office or the Registry of Motor Vehicles . You'll need to provide proof of citizenship, residency, and be at least 18 years old by the next election . Eligibility Requirements: - Be a U.S. citizen - Be a Massachusetts resident - Be at least 18 years old by the next election - Not be currently incarcerated for a felony conviction Updating Registration: If you've moved, changed your name, or want to switch parties, you can update your registration online, by mail, or in person . The automatic voter registration system also updates your records when you interact with the Massachusetts Registry of Motor Vehicles or other state agencies . Registration Deadlines: Make sure to register at least 20 days before an election to be eligible to vote . Massachusetts makes it easy to register and vote, ensuring that all eligible citizens can participate in the democratic process.”

5. “The Massachusetts voter process is a simple and thorough process by which most states follow and abide by. There are multiple ways to register to vote like with most processes, the more common ways are in person and through mailing. Some states however, also allow online

registration like Texas and California. The process is long and has a deadline usually by the end of October and takes 30 days to process the request. If you aren,Äôt able to register in time for any upcoming elections you will be unable to vote. Overall the process in which you are able to register to vote is quite simple. It is a fast process to fill out the form; however, it usually takes some time for the state to process and validate the person who is registering. There could be ways to set forth and allow a faster means of registering, so far the process is as simple as it is the only effective means to register for any upcoming elections."

6. "I honestly don,Äôt know anything about it."

7. "Well, I registered online, so it was very easy to go through the process, but from what I have heard from a couple of people that I know is that it takes longer than it should to go through it."

8. "Maybe I didn't go to the right place, but when I went to the site, it gave me an online voter application menu and I could choose what I wanted to do, like register, check status, or update info."

9. "The voter registration process seems to be pretty standard. Compared to other states. I see that you have 10 days before the election to make an updates to your registration which is a good thing."

10. "Registering to vote in Massachusetts is simple and accessible, with several ways to get it done. You can register online if you have a Massachusetts driver,Äôs license or state ID, which is quick and on"

11. "The Massachusetts voter registration website is an essential online resource that allows eligible residents to easily register to vote, update their information, and verify their registration status."

12. "Massachusetts offers a streamlined voter registration process. Residents can register online, by mail, or in person at designated locations. Online registration is particularly convenient, allowing fo"

13. "How am I supposed to review a process that hasn't been presented to me or that I'm unfamiliar with? You didn't specify if this needed to be MA voters, nor did you show that process for review."

14. "Unawares of the process"

15. "The voter registration process in Massachusetts is one of the more traditional processes because Massachusetts is part of the 13 colonies in comparison to other states has been around a lot longer"

16. "I don't see anything about the Massachusetts for the registration process!"

17. "The registration process is open to to any US Citizen. You can register at 16 and 17 despite not being able to vote until 18. You also cannot be serving jailtime for a felony currently."

18. "The massachusetts voter registration process is a simple prosess, similar to mostbother states, a simple and easy process. There are numerous ways to register to vote."

19. "Its a simple process. They give you pleantly of time to register you have until 10 days prior to election and also to make changes. Ypu can register by mail, online or in person."

20. “You can register to vote in Massachusetts online, in person or by mail. It,Äôs a fairly simple process as long as you are at least 18 years old, a mass resident, and have no felony convictions..”

Treated Condition Responses

1. “Voter registration in Massachusetts is relatively friendly, with various means to make it as easy as possible to get registered. You can sign up online, by mail, or in-person whatever works best for you. If you have a Massachusetts driver's license or state ID, the online registration is really easy, taking just a few minutes. The website will take you through it step by step, and you will receive an immediate confirmation email, which is reassuring. For people who would not feel comfortable registering online, there is also the ability to mail in registrations or register in person in various places such as the RMV, libraries, and city offices. Massachusetts even allows same-day registration during early voting-a great way to include those who decide to vote at the last minute.”

2. “Where it could improve somewhat is in making it easier on non-English speakers. Generally speaking, though, Massachusetts has done a pretty good job in making voter registration accessible and efficient.”

3. “It's basically the same as most of the other states. One must be 18 years old and have no felonies. You must be a US citizen and resident of Massachusetts. You can register to vote online, by mail, or in person.”

4. “It's basically the same as most of the other states. One must be 18 years old and have no felonies. You must be a US citizen and resident of Massachusetts. You can register to vote online, by mail, or in person. For example, you can register to vote in-person at: Your local town clerks, election commission, and boards of registrars. The office of the secretary of the commonwealth elections division. The secretary of the commonwealth,Äôs regional offices. If one wants to register online: If you have a signature on file with the massachusetts registry of motor vehicles, you can register online. You can also pre-register, update your address, update your name, and change your political party designation.”

5. “The voter registration process with conducted seamlessly with a level of accuracy. Part of the reason why that was possible is because of the introduction of the online registration process. Online registration is good for the Democracy of Massachusetts. Although, there is room for improvement on the path of the system. However, It is imperative to note that it is a welcome development in the state. This system allows for the request for absentee ballot using the Federal Voting Assistance Program. The Massachusetts government also provides for Automictic Voters Registration to allow for the easy voting of the people, One of the things that made the registration quite interesting is that you can register even when you are in diaspora. Additionally, police makers and election stakeholders should find a way of motivating voters turn out as many people tend to register for voting and end up not coming out to do that. Proper voters education and sensitization should also be part of this,”

6. “I think it's a good concept and very simple for new voters. As far as well gives people enough time to vote and also offers it to New citizens and they allow you to register online clown it to be more accessible for those unable to do it in person. One thing I do kind of disagree with but I also have an exception to is people with felonies because some of those felonies can be such things as just stuff which happened over 30 years ago when they were probably like 18 and immature from the best time goes on and if they've shown to have no more convictions no more arrests and just been living as an outstanding citizen of society I believe they should have the right to vote but those w with more violent crimes I believe she's still not be able to vote because serial killers rapist making all hold a biased view with people that have the same history as some or the same viewpoints and I think that would be a dangerous thing to allow. I think one of the main things I like is how they allow 17”

7. “The voter registration process for people who reside in Massachusetts is a very common and similar process to other states within the United States. I feel like the steps you take to register to vote are needed and completely necessary to ensure an honest and fair election process. Rules are always put into place for very good reason and we should do everything in our power to abide by these rules! Please do your part in helping our country run as efficiently as our founding fathers intended it to run! Please register today and make your voice heard! Every single vote counts and yours is just as important as anyone else's! Help ensure a healthy and happy future for our children and grandchildren! They deserve to live amazing lives, just as we did!”

8. “The Massachusetts voter registration process is well-organized and accessible, offering a variety of convenient options for eligible citizens to register and vote. One of the key strengths is the online registration system, which simplifies the process and allows voters to register or update their information quickly from home. In addition to online registration, voters can also register by mail or in person at local election offices, making it easy for people with different needs to participate. Massachusetts has clear eligibility requirements, including being a U.S. citizen, at least 18 years old by Election Day, and a state resident. The state also provides important tools on its website, such as voter status verification, polling place locator, and deadlines for voter registration, absentee voting, and early voting. These resources help ensure voters have the information they need to cast their ballots on time. Overall, the process is efficient, flexible, and inclusive, with multip”

9. “The Massachusetts voter registration process is straightforward and accessible, designed to encourage voter participation. Residents can register to vote in person at a variety of locations, including the Registry of Motor Vehicles, local election offices, and public assistance offices. For added convenience, Massachusetts also offers online voter registration, which is accessible for individuals with a state-issued ID. The process is user-friendly and allows residents to register, update their information, or check their registration status.One standout feature is the inclusion of Automatic Voter Registration (AVR), where eligible citizens are automatically registered to vote when interacting with certain state agencies, unless they choose to opt out. This significantly simplifies the registration process and boosts voter engagement.”

10. “The Massachusetts voter registration process is simple and accessible, offering online, mail-in, and in-person registration options. Same-day registration during early voting is a helpful feature, allowing people to register even after the usual deadline. The online system is efficient and user-friendly, but some may still face challenges navigating it or updating their information. While Massachusetts has made strides in making the process easier, occasional issues with deadlines and understanding requirements remain. The ability to check registration status is a helpful tool. Overall, the process encourages voter participation, but clearer instructions, better outreach, and additional assistance for first-time voters could enhance accessibility, ensuring more eligible voters can participate and increasing voter turnout. A streamlined, consistent approach to communication and resources would help address confusion and improve the experience for all voters.”

11. “In Massachusetts, voter registration is a straightforward process designed to ensure eligible citizens can participate in elections. To register, a person must be a U.S. citizen, a Massachusetts resident, and at least 18 years old on or before the next election. Additionally, they must not be under felony conviction or legally incapacitated. Voter registration can be completed online, by mail, or in person. For online registration, eligible individuals can visit the Massachusetts Secretary of the Commonwealth‚Äôs website and submit the required information. To register by mail, individuals must fill out a voter registration form and mail it to their local election office or the Secretary of the Commonwealth‚Äôs office. These forms are available at post offices, libraries, and municipal offices. In person registration can be done at the local election office, city or town hall, or any registry of motor vehicle branch. Voter registration deadlines are typically 20 days before an election.”

12. “The Massachusetts voter registration process is designed to be straightforward and accessible, making it relatively easy for residents to participate in elections. The state offers multiple methods for registration, including online, by mail, and in-person at designated locations. The online registration system is particularly user-friendly, allowing voters to complete their registration in just a few minutes if they have a Massachusetts driver's license or ID.”

13. “I think it is pretty simple; Voting by mail was easy and made it so that it was not a hassle to drive and wait in the long lines on election day. I got mine mailed to me and this is similar to what is done in other states as well. I may try to vote online for the next election which may be even easier than voting by mail. I think that because registering to vote is pretty much the same in a lot of states, the Massachusetts process is easy and straightforward as well. Automatic voter registration is also a nice perk that is offered by the state of Massachusetts. Personally, I have never moved so changing my registration has not been an issue for me but I am not too familiar with the process of changing an address for my voter registration.”

14. “The voter registration process is pretty seamless. All you have to do is provide your license (which includes your name, address, photo ID etc) and go to your local voting polling area. You can also obtain registration by mail. With Massachusetts being one of the more progressive states in the United States of America, the process is pretty seamless and quick with not a lot of red tape to sift through. Another aspect to consider is what party you will align with when selecting a

political affiliation to align yourself with. One of which is Democrat, which has a longstanding history of being closely aligned with the majority of Massachusetts voters. The state of Massachusetts typically votes for a Democratic candidate in elections. Democrats are usually more socially acceptable and liberal in terms of their ideals and political beliefs. Another party to consider is Republican, the party in which the newly elected President, Donald Trump, belongs to. They are typically more traditional."

15. "The Massachusetts Voter Registration Process educates new voters on key details related to eligibility, registration options, and deadlines, guiding residents on how to register effectively. The process also offers voters useful links to help them check their registration status, find election offices, and request assistance, making it a helpful, organized new process for new and returning voters."

16. "The Massachusetts Voter Registration Process ensures that voters are eligible to vote in upcoming elections, that they will be registered correctly for those elections, that address discrepancies can be resolved prior to voting, and enables them with the tools they need to vote in the way that's most convenient to them. For additional details about the Massachusetts Voter Registration Process, new voters should visit the Commonwealth of Massachusetts voter registration information page at https://www.sec.state.ma.us/divisions/elections/publications/information-for-voters-24/reg_vote.htm"

17. "I am not familiar with the Massachusetts voter registration process, but I assume it is similar to the process in my home state. I believe I registered to vote when I purchased a state ID, but I know there are other options as well. I think citizens can also register online using their name, address, and some form of ID. There is also another way people can register to vote, and that is by mail. There are voter registration forms that are available, and they can be filled out and then mailed to the appropriate institutions. I feel like by offering in-person, online, and mail-in forms of voter registration, there are no barriers to registering to vote. If someone is unable to do it in person, they can do it online; if they don't have access to the internet, they are able to simply fill out a form and send it via mail.¬†"

18. "The Massachusetts voter registration process is designed to be straightforward and accessible. Eligible residents can register online, by mail, or in person at various government offices, including the Registry of Motor Vehicles (RMV). The online registration system is particularly user-friendly, requiring only basic information such as name, address, date of birth, and the last four digits of a Social Security number. The process is also open to new voters, as well as those who need to update their registration due to changes in address or party affiliation. One of the key features of Massachusetts' system is its early voter registration deadline, which is 20 days before an election. This gives voters ample time to ensure they are registered before Election Day. For those who miss the deadline, same-day registration is available at designated locations during early voting periods."

19. "The Massachusetts voter registration process, as with the other 49 states, can be completed on Vote.org in under two minutes. Basic information including the voter's first name, last name,

street address, city, state, zip code, date of birth, email, phone number, an acknowledgment of terms and services as well as Vote.org's privacy policy. Once all details are submitted the interested voter will receive a confirmation. Alternatively, online voter registration for Massachusetts is available on sec.state.ma.us/ovr. Prompts include confirming United States citizenship, being over the age of 16, an ID issued the Massachusetts Registry of Motor Vehicles, confirmation of first name, last name, date of birth, the 9 character RMV ID number and consent to use the RMV signature on file with the Massachusetts RMV. Once the above prompts are completed, the voter will be informed if submission is successful. In addition, a potential voter may register on voteamerica.org with basic information."

20. "Like other states within the U.S., voter registration in Massachusetts is available via mail, online, or an in-person visit at your local town hall, for a town clerk, election commission, or Boards of Registrars to help. The Office of the Secretary of the Commonwealth Elections Division as well as The Secretary of the Commonwealth's regional offices are also options available to those seeking voter registration. For some folks, one does not even need to visit their particular town hall, as one could visit a different town's hall and receive the form for mail. With so many resources available, voter registration within Massachusetts is accessible if not an easy process. Most citizens will have completed their registration when obtaining or renewing their driver's license, and immigrant's who have had their naturalization ceremony will have the proof necessary to begin an application even if it occurred after the voter registration deadline."
